## It Pays to be an IMTA Member!

The Iowa Motor Truck Association's fuel savings program offers you an immediate return on investment with your fuel costs. Take advantage of a 4-cent savings per gallon in the state of Iowa and 3-cent savings throughout the rest of North America. This makes every 100 fuel stops worth a minimum of \$450\*.

It's available to any size carrier, even if it's already enrolled in a program but curious whether there is a better option to increase savings. The only stipulation is all participants must be a member of the IMTA.

So it begs the question – Do you want to be part of the IMTA's most valuable member program yet?

*\*Savings estimated at \$0.03 per gallon for a 150-gallon truck. See chart below for more details.*
